

POMS: The Connected Ecosystem

Architectural Specification for the AMR Coordinator Portal

Infoziant internal platform | Status: Draft Approved

The Anatomy of POMS

Module 01: The Foundation

Security & Roles

The centralized gateway. Determines identity, enforces permissions, and protects core data logic across 20+ internal users.

Module 02: The Brain

Master Database

The live, collaborative memory. Curates 5,000–8,000+ companies with intelligent duplicate detection and real-time multi-user syncing.

Module 03: The Heartbeat

Daily Tracker

The active execution loop. The primary daily workspace where coordinators log 70+ placement calls using high-speed, keyboard-first automation.

Unified Gateway Authentication

A single login screen serves all personnel. The system auto-detects the assigned role post-authentication and dynamically routes to the appropriate dashboard without requiring role-specific entry points.

Role-Based Permission Matrix

Feature / Action	Coordinator (The Operator)	Team Leader (The Supervisor)	Admin (The Governor)	TPO (The Observer)
Daily Call Tracker				
Edit Master Company Info				
Edit HR Contact Info				
System Configuration				
View Positive Leads				

Green Check = Yes, Red Cross = No, Eye Icon = Monitor / Read-Only

Bimodal Data Classification

Protected Master Info

Immutable to frontline staff.
Editable only by TL and Admin.

- Company Name 🔒
- Website 🔒
- Industry 🔒
- Address 🔒
- Company ID 🔒

Operational Info

Dynamic and fluid. Freely editable
by Coordinators as they discover
new details during daily calls.

- HR Name ✎
- Mobile Number ✎
- Email ID ✎
- Designation ✎
- Remarks ✎

The Brain: An Operational Repository, Not a CRM

POMS rejects traditional CRM bloat in favor of a live, Excel-like collaborative repository built for speed at a 10,000+ record scale.

	Company Name	Industry	Company ID	HR Contact Name	HR Email	HR Mobile	Designation	Last Updated By	Created By
	Acme Corp	Technology	C12345	Sarah Johnson	sarah.j@acme.com	+1 555 0101	HR Manager	John D. (Admin)	Jane S. (Coordinator)
	Beta Solutions	Finance	C12346	David Lee	david.l@beta.com	+1 555 0102	Recruiter	David L. (TL)	David L. (TL)
	Gamma Industries	Manufacturing	C12347	[Viewing] Emily Chen	emily.c@gamma.com	+1 555 0103	HR Director	Emily C. (Admin)	Mark T. (Coordinator)
	Delta Logistics	Transport	C12348	Michael Brown	michael.b@delta.com	+1 555 0104	HR Specialist	Michael B. (Coordinator)	Michael B. (Coordinator)
	Epsilon Services	Consulting	C12349	Chris Wilson	chris.w@epsilon.com	[Editing] +1 555 0105	Talent Acq.	Chris W. (TL)	Lisa P. (Coordinator)
	Belta Corp	Finance	C12349	Chris Wilson	chris.w@epslon.com	+1 555 0105	Talent Acq.	Chris W. (Coordinator)	Lisa P. (Coordinator)

Core Mechanics

Simultaneous Collaboration:

Database is never locked to a single user.

Live Presence Indicators:

Green (Actively viewing), Purple (Actively editing a cell).

Persistent Audit Trail:

“Created By” and “Last Updated By” permanently displayed on every record.

Intelligent Duplicate Detection

Safe Deletion: The Recycle Bin Model

The original requirement of “emailing a Team Leader on every deletion” was **discarded** as **noisy** and inefficient.

Loading the Day's Work

Rejected Designs

Failed because coordinators don't memorize daily targets in advance.

Full M2 Access: Failed because exposing master edit controls during daily prep caused accidental deletions.

Final Solution: Read-Only Picker

The Mechanic

A secure, read-only checkbox modal overlaying the Master Database.

The Result

Coordinators bulk-select ~70 rows and pull them directly into their daily grid without manual typing or risk of corrupting core data.

The Keyboard-First Call Loop

Call Outcomes & Soft Validation

Submit Day Process

Streamlining Data: 'Response 2' (long-term placement statuses) was intentionally stripped from the Daily Tracker to preserve its focus purely on today's activity.

The Synthesis: How the Ecosystem Thinks

Future Enhancements & Evolution

Module 01 Horizons

- Biometric Login
- Microsoft / Google Workspace SSO integration

Module 02 Horizons

- Bulk Paste Excel extraction
- Native LinkedIn Company Page linking

The Next Handoff: Module 04

Once a lead goes 'Positive' in the Daily Tracker, it automatically ports to Module 04 (Weekly Tracker) for the long-term placement lifecycle (JD Received, Interviews, Offers).
